

Conduction Exhibits

Holding Heat

Participants will learn that different materials conduct heat away from their hands at different rates.

Heat Races

Participants will learn that metal is a better conductor of heat energy than wood.

Conduction Exhibits

Putting the Breaks on Heat

Participants will learn that a layer of insulation (a thermal break) can be used to reduce the flow of heat energy through a wall section of a house.

Which Window?

Participants will learn that metal window frames are better conductors of heat than ones made from plastic.
